

Season 2 Episode 5

Unwanted Import

Excavators from the Asterix Empire are at an excavation site at nighttime where they are in a large crater. They use cranes to dig out and they pull out a hard solid block of ice. The lead excavator looks at the ice and he uses a device to scan it. He said, "It looks like it is him. He is alive and he is in our grasp. We will have to get him out of this." The lead excavator drills a very thin hole in the ice and he places a very thin anti-ice detonator in the ice block. Keith is with a legion of monks and they hide in a crevasse in the crater. Keith uses binoculars to view the Asterix Empire removing the ice block. Keith signals for the monks to attack. The monks jump out of the crevasse and Ivan, Safron, and Dirk are among them. The monks fight off the Asterix Empire excavators. Ivan slashes some of them down. Safron skates past some of them and she smacks a few with her skateboard. Keith spots the controller in the cockpit of the crane. Keith points to the controller and Dirk tightens his fists together. Dirk takes out a can of silly string and he fires it to the control cockpit of the crane. Dirk smacks off the controller and he gains control of the crane. Keith presses a button on his watch and a large monk transport arrives and hovers over the excavation site. A large compartment on the transport opens and Dirk positions the crane to drop its contents into the compartment. The monks pile aboard the transport and it heads off.

Ivan and Keith are in Master Augi's office and Augi looks over the reports. Augi said, "You are sure this thing is something of importance?" Keith said, "I have been following up with excavation sites all over the Ultraverse. It appears as if the Asterix Empire is looking for something. They seem to have a strong interest for whatever is frozen in that block of ice. It may be something they can use to aid their invasion plan of the Ultraverse." Augi said, "I understand the premise of our intersection of the Asterix Empire's possible plan. We do however need to observe what the importance of the ice block is. Have it brought to a monk lab. I want you, Keith, and Ivan, to examine it and report anything you find on it to me." Keith said, "Yes sir." Keith and Ivan bow to Augi.

Ivan and Keith are in a monk lab where the ice block is behind glass and is connected to several wires and computer systems. Ivan and Keith look over a computer giving specs of the ice block. Keith said, "There appears to be a life form inside the ice block. It looks like the computer has collected enough information to produce an image of what is inside the ice block." The computer shows an image of a

thin wrinkly old man with a long white beard. Ivan's eyes go big. Keith looks at Ivan and Keith said, "You know this man?" Ivan said, "I am pretty sure he is in one of those Yin-Yangite books I have." Keith said, "I thought we found out that those books are a load of bull." Ivan said, "Not everything in them is bull. These books were written from generations of Yin-Yangites that came across all kinds of things." Ivan takes out one of the Yin-Yangite books and he finds the page with the wrinkly bearded old man. Keith looks at the book with Ivan. Ivan said, "It seems as if this guy is Ultraverse Santa." Keith said, "Why am I not surprised that there is a Santa in the Ultraverse?" Ivan said, "This Santa comes out every Ultraverse year on a certain date. He rewards good people by giving them gifts and he punishes bad people by burning them in a large pot of corrosive acid." Ivan and Keith look at a page that shows the Ultraverse Santa grabbing onto a kid and placing him in a cauldron of a corrosive liquid and the kid's skin is getting burned to a point where he is nothing but bones. Ivan said, "We rescued a monster." Keith said, "We are not sure if that book of yours is accurate or not. It could be a load of bull like that other Yin-Yangite crap you fell for."

Ivan and Keith look at the book and they come across illustrations of Santa manipulating people. Ivan said, "It appears as if this Ultraverse Santa is a master manipulator. It looks as though manipulates people by all means to take his side. It seems as if this Santa's greatest aspiration is to rule over people." Keith said, "This Santa is a dictator. No wonder why the Asterix Empire wanted him." Ivan said, "It gets worse. It seems he also has some kind of Christmas magic on his side that he often uses to punish people." Ivan and Keith are mesmerized by the book and they don't see the thin anti-ice detonator is activated and it explodes causing shards of ice to go flying everywhere. Ivan and Keith hear a blast and they turn around and they see the Ultraverse Santa in the lab. He has his back hunched and he has a deranged look on his face. He kicks down the lab door and he escapes the lab and he wanders off into the Ultraverse streets at night. Keith said, "What date does your book say he comes out at?" Ivan said, "It is date 232123." Keith looks at his watch and the date reads, "232123." Ivan and Keith's eyes go big.

Safron is sleeping in bed and she is dreaming about getting close and personal with Ivan. Santa breaks into her house and he stands over Safron and he looks at a scroll of paper that serves as his "Naughty List" and Safron's name is on it. Santa grabs onto Safron and he places her in a magical sack he has. Santa breaks into the Ultraverse Library and he sees monks standing around reading books and researching things. Roswell is at the front desk and he said, "May I help you, sir?" The Santa goes to Roswell and he gives Roswell a deranged look and he looks at his list. Santa points at everyone and he said, "You are all on my naughty list." The monks (including Roswell) draw their swords at Santa. Roswell said, "Nice try but it will never work on any of us."

Santa smacks down one of the monks and the rest of the monks jump at Santa with their swords aimed at Santa. Santa ducks and all the monks crash into each other. The monks run for Santa. One monk tries to slash at Santa and he grabs onto the blade of the sword and he lifts up the monk by the blade of the sword and he throws the monk into his magical sack. More monks pile into the library (with Dirk being among those monks) and Santa goes to fight against all of them. Santa smacks Dirk in the face and he throws the smacked Dirk into his sack. Santa uses his sack to smash down a swarm of monks and he places all the knocked down monks into his magical bag. Santa's sack is much larger and the library is mostly void of monks. Santa sniffs the air and he said, "Something tells me there is still a naughty creature in this library that deserves a punishment from me." Roswell is perched on a chandelier in the library. Roswell looks down at Santa. Roswell has a watch on one of his feet and he uses his beak to press a button on the watch and text on the watch's screen reads, "Watch Tracker Activated." Santa keeps sniffing the air and he said, "The scent of a naughty creature is coming up from... there." Santa looks up and sees Roswell dangling on the chandelier. Roswell said, "Looks like you can't reach all the monks." Santa said, "Oh really?" Santa jumps and he ascends into the air and he zips to the chandelier. Santa magically hovers over the chandelier. Roswell takes out his sword and he duels Santa and Santa uses his arms to block Roswell's sword swings. Roswell keeps swinging and Santa gets a grip on the blade of Roswell's sword. Santa throws Roswell's sword downwards. Roswell uses one of his claws to scratch Santa on the face leaving red scratch marks on his face. Roswell attempts to zip away by flying away but Santa grabs onto Roswell's foot. Santa yanks Roswell into his magic sack.

The streets are in chaos. Ultraverse cops block off the street of the library and they aim their weapons at the library. Santa walks out with his magic sack and the cops open fire on Santa. Santa raises his arms and he absorbs all the bullets fired on him. Santa uses his magic and he dashes to the front line of cops and he smacks all of them down row by row with his magic bag and he collects the cops. Some fighter cops come to fight Santa and Santa beats them down like they are nothing. Remaining cops retreat. Everyone runs away from Santa. Santa looks at his sack and he said, "I think I caught enough naughty people to begin my plan. I can always come back for more." Santa whistles and a magical sleigh being pulled by reindeer show up. Santa jumps in the sleigh and he zips off. Keith and Ivan are on the roof of a building and Keith is watching this with his binoculars. They watch Santa fly off. Ivan said, "We have a serious problem on our hands." Keith said, "Of course we do." Ivan said, "Santa could imprison the entire Ultraverse. He took down those cops like they were nothing. How are we going to find where he is?" Keith shows Ivan his watch and he said, "Roswell was one of his victims. I have Roswell's signal location being shown on the screen of my watch. It has a map of the Ultraverse. It looks like Santa is flying to a universe with a somewhat whimsical nature. We are going to go after him. In the meantime, check that book of yours and see if it says anything about a weakness or if it suggests a weakness. That book of yours may be the only key to defeating this, Santa."

Ivan and Keith are in a monk transport that is piloted by Keith using coordinates from his watch. Ivan is reading his book. Ivan said, "It seems our Santa likes to live in in universes where most materials are made from edible sugary materials. It also says he often manipulates different small sized species to work for him. It says that most of Santa's toy productions happen in small colorful houses." Keith pilots the transport over a flat pink surface and he lands there.

Keith works on a ray gun that is blue and yellow. Keith said, "If we are going to stop this Santa, freezing him may be one of our only options. It seemed to stop him for several years. I have been building heavy duty freeze rays for years. This one will freeze him into a hard ice block."

The world's surface is pink and it has candy canes growing out of the ground with trees that contain sugar plums growing on them. Ivan and Keith explore the world and they come across a lake of orange soda with red, white, and green, mint candies floating on the lake. Keith said, "Jason would love this world." Ivan gives Keith a stern look. Ivan and Keith jump on the candies floating and they take out their swords and use them to paddle to the other side. Ivan and Keith spot what looks like a gingerbread house and it has a chimney with smoke coming out of it. Ivan looks in his Yin-Yangite book and he said, "The house out there looks like the kind of place where Santa's minions would be making toys."

Ivan and Keith barge into the gingerbread house with their swords drawn. Elves are working on toys in a whimsical looking factory where they hammer things down and drill things together. All the elves stop what they are doing and they stare at the front door where Ivan and Keith have their swords drawn out. The lead supervisor elf confronts Ivan and Keith. The lead elf said, "You know non elves nor Santa are not allowed in the factories." Ivan said, "We've come looking for someone. Your Santa. He captured and imprisoned our people. He took something from us." Keith said, "We've come to bring you the truth about your master." The supervisor elf said, "There is nothing wrong with our master. He has given us work to do and he has given us food and shelter in return. He has saved us from the impoverished world we used to come from." Keith said, "You came from an impoverished world?" The supervisor elf said, "Our world was in a great depression. The stock market crashed and banks went broke and pretty much all of us all over our world were left homeless and with nothing. Santa came and told us about this great job offer and we took it without any second thoughts. We've been at this game longer than anyone has cared to count." Ivan looks through his book and he finds the page on Santa's manipulation. Ivan said, "You should take a look at this." Ivan hands his book to the supervisor elf. The elf looks over the part that deals with Santa destroying economies and going to extreme measures to get people to

take his side and work for him. The supervisor elf keeps reading the articles on Santa burning bad people with corrosive acid. The supervisor elf's eyes go big.

Santa barges into the factory and he sees Ivan and Keith in the front of the factory. Ivan and Keith aim their swords at Santa. Santa said, "You elves let these naughty intruders into the factory. Don't you worry. I will deal with them accordingly." Santa goes to strike a blow at Keith and Keith blocks it with his sword. Santa throws more punches into Keith and Keith blocks them with his sword. Keith slashes Santa in the gut and he smacks Santa in the head with his sword. Keith takes out his freeze ray and fires it but Santa jumps out of the way. Santa said, "You asked for it." Santa jumps over Keith and Keith turns around and Santa is not there. Santa is behind Keith and he smacks Keith down and he places Keith into a magical sack. Santa said, "Now for you." Ivan aims his sword at Santa. Santa pushes Ivan's sword aside (with the sword still being in Ivan's grip) and he gets close to Ivan. Ivan rattles in fear and Santa touches Ivan's head. Strange impulses with yin-yangs in them fly through Santa. Santa said, "Hmm. You seem to be a special case. You seem to be one of those, Yin-Yangites I have been hearing about. I could use a Yin-Yangite. You are gifted. I am gifted. We can do better for the Ultraverse. The Ultraverse has cheated us. Don't you feel you could become something much more if you left the Ultraverse monks. That's what I did and now, look at how powerful I have become. I am not a Yin-Yangite. I was just a normal monk before I became this. You being a Yin-Yangite gives you a much better chance at achieving greatness than me." Ivan said, "Why did you leave the Ultraverse monks?" Santa said, "They are not what you think they are. They think they are just these people that spread peace and end conflicts in the Ultraverse. Look at what they have done. They have started a civil war between the Red Moon Monks and the Red Star Monks. It started because you monks interfered with their business. You monks are also responsible for why the Asterix Empire wants to go to war with the Ultraverse. You monks do nothing but cause more injustices to the Ultraverse. We can end this all." Ivan gives Santa a stern look. Ivan said, "You are just a mad fool that is messed in the head." Santa said, "So be it." Santa grabs onto Ivan and he places Ivan in his magic sack. Santa looks at the elves sitting there and Santa gives an angered look to the elves and he said, "Get back to work." Santa leaves the factory. The elves look disturbed and the supervisor elf shows the elves Ivan's book.

Santa is in his ultimate base which is some kind of technology lab located inside a giant pink mound of land. Everyone Santa captured are placed into a large sack that is held by a rope over a giant cauldron held up by candy cane support beams. Santa stands on a ledge with controls. Santa said, "Now, it is time I give all these people the punishment they deserve." Santa is about to pull the switch and Santa's elves barge

into the lab and the supervisor elf said, "We built that thing for Santa and we know how to take it down." The elves take out large red and green mallets and they smash at the support beams. They break and the cauldron falls over and all the pink corrosive goo is sent out on the floor of the lab and is drained by sewer covers on the lab floor. Santa looks down at his elves and he said, "Now you are with them?" The supervisor elf said, "Now I know the truth and I know that you are nothing but a mad man. Let's get him." The elves pile up on Santa. Santa uses his magical strength to throw the elves off him. Some of the elves go to the controls and they flick the switch that lowers the sack and it falls to the floor and opens and all the monks and cops roll out. The monks aim their swords at the Santa. Santa gives them a stern look and he said, "You are only prolonging your fate." Santa jumps down and he goes to fight the monks. Santa beats down several of them. Keith stays on the sidelines and he takes out his freeze ray and he tries to get a lock on Santa. Ivan sees what Keith is attempting to do. Ivan stands in the center of the large battle between the monks and Santa. A yin-yang forms around Ivan and Ivan ends up in his yin-yang mech with a sword for one hand and an arm cannon for the other. Ivan runs after Santa and he duels Santa with Santa using his arms as swords.

Ivan slashes his sword fast and Santa blocks all the attacks. Ivan fires some blasts at Santa and Santa grabs onto the blasts and he fires them back at Ivan. Ivan is knocked down and he is sent sliding across the floor. Santa stands over Ivan and he crushes the front chest plate of Ivan's yin-yang mech with his foot. Dirk grabs one end of Santa and pulls him off Ivan. Safron grabs the other side of Santa and they both hold Santa in place. More monks crowd around and they grip onto Santa. Santa said, "You monks are only going to..." Keith said, "Shut up." Keith fires his freeze ray at Santa and he is frozen in a thick solid ice block. Ivan said, "Well, we took care of that." Safron said, "I am glad to see my boys were still able to collaborate together to beat Santa. Especially you, Ivan." Safron gets close to Ivan. Keith looks at his watch and he said, "It looks like something is heading this way. It looks like more..." The ceiling of the lab explodes and Asterix Empire warships fly over the lab. They deploy troops armed with assault weapons and they land in the lab. They battle with the monks. Keith tries to stay near the Santa in ice but the troops pull Keith away from the ice Santa. A claw on a wire from the warship connects to the ice Santa and it is pulled up and collected by the Asterix Empire warship. Keith said, "We must retreat!" All the monks leave what is left of the lab and they are chased through the whimsical candy world by the Asterix Warship. The Warship zips fast and it hovers over the large group of monks and cops. An elf in a large high-tech saucer ship hovers over to the monks and cops and he said, "Jump in." The monks jump in. The warship keeps firing shots at the elf in the flying saucer and he fires whimsical candy-based weapons at the warship. He fires gooey candies that get sticky when they hit the turrets on the warship leaving their weapons useless. The elf ship flies the monks to their transport ship and they get away.

The Santa is brought to the office of General Philip Williams where he examines the Santa in the ice. General Philip Williams said, "Good. We have our prize. We are building a greater army of greater forces in the Ultraverse. We are gaining the upper hand on those monks. Their grasp on the Ultraverse keeps dwindling."
